LinkedIn: [linkedin.com/in/maximvasilkov](https://www.linkedin.com/in/maximvasilkov)

Professional Summary

As an innovative and solution-oriented Software Developer, I bring over 15 years of experience in technology leadership, specializing in designing, developing, and implementing scalable software solutions. With a comprehensive mastery of a broad spectrum of programming languages and frameworks, I excel in both front-end and back-end development. My tenure as a Head of engineering and my hands-on approach to software engineering have honed my ability to lead cross-functional teams towards delivering software that not only meets but exceeds business objectives. Recently pivoting towards Artificial Intelligence, I have demonstrated my commitment to innovation and excellence by securing the 2nd prize at the Hackadtech23 hackathon for our pioneering AI Chat Bridge project. I am eager to leverage my technical expertise, collaborative skills, and visionary leadership in a role that challenges me to drive technological efficiency and innovation.

Skills & Abilities

- **Software Engineering & Programming:** Proficient in developing robust software solutions, with a keen interest in blockchain technology and Ethereum smart contracts.
- **Mobile and Web Applications:** Experienced in mobile applications development and creating dynamic web services and web applications.
- **Project Management:** Skilled in software project management, adept in Agile methodologies, Scrum, and technical recruiting.
- **Leadership & Strategy:** Proven track record in IT management and as a founder of a regtech startup.
- **Analysis & Problem Solving:** Strong abilities in requirements analysis, business analysis, and integration.
